

Authorities have laboratories and experts
Populations need laboratories and experts

A NEW LABORATORY IN JAPAN

Main lines of our action:

- ✿ Decision by the membership to put the priority to help the Japanese
 - ✿ Open a new laboratory in Japan
 - ✿ Provide analysis in France

- ✿ Always start from the questions of the population

ACRO's monitoring in Japan

- ✿ About 600 measurements on samples from Japan
- ✿ All our data in French, English and Japanese:

acro.eu.org

Why a new laboratory?

✿ Many measurement stations

- ✿ No equivalent in Europe after Chernobyl
- ✿ NaI scintillator

✿ Answer to the other questions:

- ✿ Ge detector
- ✿ Urine
- ✿ Specific investigations...

Challenges:

- ✿ Aim: protect the environment and population
- ✿ Individual and collective levels
 - ✿ Start from the questions of the citizen
 - ✿ Produce reliable data and expertize
 - ✿ Publish all data with explanations
 - ✿ Influence the authorities

Relations with the authorities:

- ✿ The new lab cannot replace the authorities (about 300 tests/y)
- ✿ The new lab should influence the policy of the authorities
- ✿ Its data and comments should be trusted
- ✿ In France: Accreditation from the state:
 - ✿ Quality assurance (QA)
 - ✿ Inspection

Project:

- ✿ New laboratory in Japan to replace the support from France
- ✿ It will be a fully independent body
- ✿ Fund raising:
 - ✿ Donations from many individuals
 - ✿ Concert in Germany
 - ✿ Christmas market in Switzerland
 - ✿ Support from Ile de France (パリ県)
- ✿ Very efficient Ge detector ordered

Futur

- ✿ Long time run

- ✿ Flexible in case of crisis:

 - ✿ ACRO+Chikurin = 5 Ge detector

Thank you for your attention
